

Welcome to Vista Products.
Explore the best in Designer Window Coverings.

A photograph of a living room interior. In the foreground, a dark grey armchair is partially visible. Behind it, a grey sofa with a patterned cushion sits in front of a large window. The window is covered with light-colored, pleated shades. To the right of the sofa, a dark wood side table holds a lamp with a pleated shade and a glass base, and a small wooden box. A framed landscape painting hangs on the wall above the side table. In the bottom left corner, a wooden bookshelf is partially visible.

*Cellular Vertical &
Standard Cellular Shades
Grande China White 6339C*

CELLULAR shades

Built with beauty and energy efficiency in mind, Cellular Shades complement any décor with style and versatility.

- crisp polyester fabrics repel dust and dirt
- superior energy and sound insulation
- over 250 designer colors including bold hues and neutrals
- multiple operating systems
- light filtering and room darkening styles

Full, rich pleats - that best describes the appearance of our cellular shades.

Many of our fabrics feature a patented D-cell design that maintains a dimensional fullness throughout the entire length of the shade. Though all shades are affected by the pull of gravity, our cells are shorter on the back by design so only the back side flattens, allowing the front of the shade to maintain its fullness from top to bottom! Our shades offer a consistent appearance day in and day out.

*Horizontal Shading
Nuance Paper Moon NU203*

horizontal SHADINGS

Horizontal Shadings unite draperies, shades and blinds into one exquisite and stylish design. These sophisticated shades are constructed of soft 2 ½" fabric vanes suspended between sheer facings. Not only are they beautiful, but these smart shadings roll up and disappear into a sleek headrail for an unobstructed view.

- light filtering and room darkening styles
- block 87% of harmful UV rays when tilted open and 99% when closed
- continuous cord or motorization operation

vertical SHADINGS

Vertical Shadings combine the beauty of a soft sheer drapery with the practicality of a vertical blind. The sheer panel softly diffuses light while soft fabric vanes provide privacy when closed. *Vertical Shadings* feature a 5" high opaque facing built into the fabric to conceal the slim track.

- combination rotation/traverse wand is a child-safe choice
- one way or split draw
- recommended as outside mount / one-way draw for best coverage

SOLAR SCREEN shades

Solar Screen Shades will preserve your view yet work hard to improve energy efficiency by reducing glare and heat gain. By substantially blocking harmful UV rays, solar screen shades will help protect furniture and carpet from fading. Chosen by top architects and builders, Solar Screen Shades are the perfect blend of beauty and function.

- varying degrees of openness will achieve different levels of privacy
- customize with decorative hem bars, fascias or cassette 120
- control light, temperature, and glare

Did you know?

A darker colored fabric provides more contrast in high glare situations and offers the clearest view to the outside. Lighter colored fabrics reflect light and the view will not be as clearly defined.

ROLLER shades

A long time favorite, *Roller Shades* feature clean lines and a streamlined appearance. Updated colors and options create a traditional shade that will never go out of style.

Roller Shades are constructed from a wide range of fabric choices and offer simple functionality. Add a splash of color to any room, also a perfect base when layering window treatments.

- semi-sheer to blackout fabrics
- stylish options for top or bottom of shades
- coordinating roman shades and panel tracks
- multiple operating systems

WOVEN WOOD *shades*

Woven Wood Shades also known as *Natural Shades* are truly natural! Woven from bamboo, reeds, grasses, jutes, and yarns for a one-of-a-kind look that synthetic materials cannot match, woven woods bring a warm and cozy feel to any room. Distinctive variations in colors and materials are part of their unique charm. Woven Woods are available in three styles; traditional roman style shades, folding panels and panel track.

- 6" high matching valance included
- light filtering or room darkening liners for added privacy and light control
- unique operable liner gives you greater flexibility with 2 shades in 1
- multiple operating systems
- decorative edge bandings add a touch of color

PANEL TRACKS

Panel Tracks, also known as sliding panels, offer a simple and stylish alternative to vertical blinds for large sliding glass or patio doors. Fabric panels hang vertically and slide across a streamline track. Panel Tracks bring clean, contemporary lines to wide expanses of glass or space, covering large windows or serving as a functional room divider.

- best suited for large windows, sliding glass/patio doors
- large selection of fabrics from sheer to blackout
- also available in specific woven wood patterns

ROMAN *shades*

Roman Shades create an elegant look that will express your sense of style and make your guests feel welcome. From the classic look of the flat-fold style to the elegant appeal of looped style, Roman shades combine the beauty of fabric window coverings with the easy operation of a blind. Romans are offered in a variety of fabrics from semi-sheer to room darkening and solar screens.

- 6" high matching fabric valance included
- scallop and trim valance options add character and style
- operating systems include continuous cord lift and motorized

ECLIPSE™ shutters

Eclipse Shutters are offered in a variety of sizes, colors and frame styles to fit most any décor or mounting situation. Eclipse shutters transform ordinary windows into extraordinary windows! Waterproof and completely washable, Eclipse shutters are guaranteed not to warp, peel, crack, chip or fade. Panels are lightweight yet incredibly strong with panel widths up to 36".

FAUXWOOD blinds

Durable and easy to maintain, *Fauxwood Blinds* are specifically designed to meet your needs while projecting the warm and comfortable look of wood blinds. Made from expanded PVC, fauxwood blinds are an excellent choice for high humidity environments or high traffic areas.

- water and flame resistant
- 2" and 2 ½" slat sizes
- variety of whites and off-whites, or realistic wood grains
- matching 3 ½" fauxwood verticals
- louvered arch with moveable slats; in white and off-white

WOOD blinds

Crafted from finely grained hard woods, our elegant *Wood Blinds* bring the warm beauty of nature into your home. These durable yet light weight blinds are as functional as they are beautiful. Available in several painted colors, stained wood colors and rustic distressed finishes, wood blinds complement most styles of furniture and décor. Wood blinds are available in 1", 2" and 2 ½" slat sizes to fit all your window needs.

- decorative tapes dress up your blinds; provide additional light control
- specialty options include routless, motorized, and cordless lift
- crown valance adds a finishing touch

VERTICAL *blinds*

Sleek, modern and distinctive, Vista *Vertical Blinds* are window coverings that are functional, durable and a beautiful addition to your home. Verticals are a traditional window covering for sliding glass and patio doors and are available in a wide variety of styles to suit your needs, from practical to fashionable. A versatile solution, verticals provide energy efficiency, excellent control of light or privacy, and they will stack back neatly to offer wide open views.

*Fabric Vertical:
Lace White LA1010*

- louvers rotate 180 degrees
- fabric, fauxwood, traditional crown vinyl and S-curve vinyl choices
- most fabrics can be inserted into groover for added light and privacy control
- perfect for tall or wide windows
- available with standard cord & chain or optional wand control

PLEATED shades

A more traditional alternative to cellular shades, *Pleated Shades* offer crisp pleats of fabric in a broad spectrum of colors and textures. Durable fabrics, rich colors and innovative designs make our pleated shades a stylish addition to any home. When wide open views are desired, just raise them up and these shades will practically disappear.

- 1" and 2" pleat sizes
- unique ladder system keeps 2" pleats spaced evenly from top to bottom
- add an optional liner to increase privacy

ALUMINUM *blinds*

Sleek, aluminum mini blinds are a great way to make a bold color statement. An affordable solution to cover your windows; mini blinds provide excellent privacy and light control and are not affected by humidity or sun exposure.

- available in 1" and 2" slat sizes
- 46 colors to choose from
- Windsor-Plus and Windsor-Shadow feature a contoured headrail eliminating the need for a valance
- Windsor-Shadow has hidden rout holes for added light control
- decorative tapes and motorization options available with 2" size
